

Download Software

- Download Pd from:
<http://msp.ucsd.edu/software.html>
(use the 32bit version...)
- Download GEM from:
<http://gem.iem.at/>
(download the binaries for your specific platform, not the source).

Add path to Gem

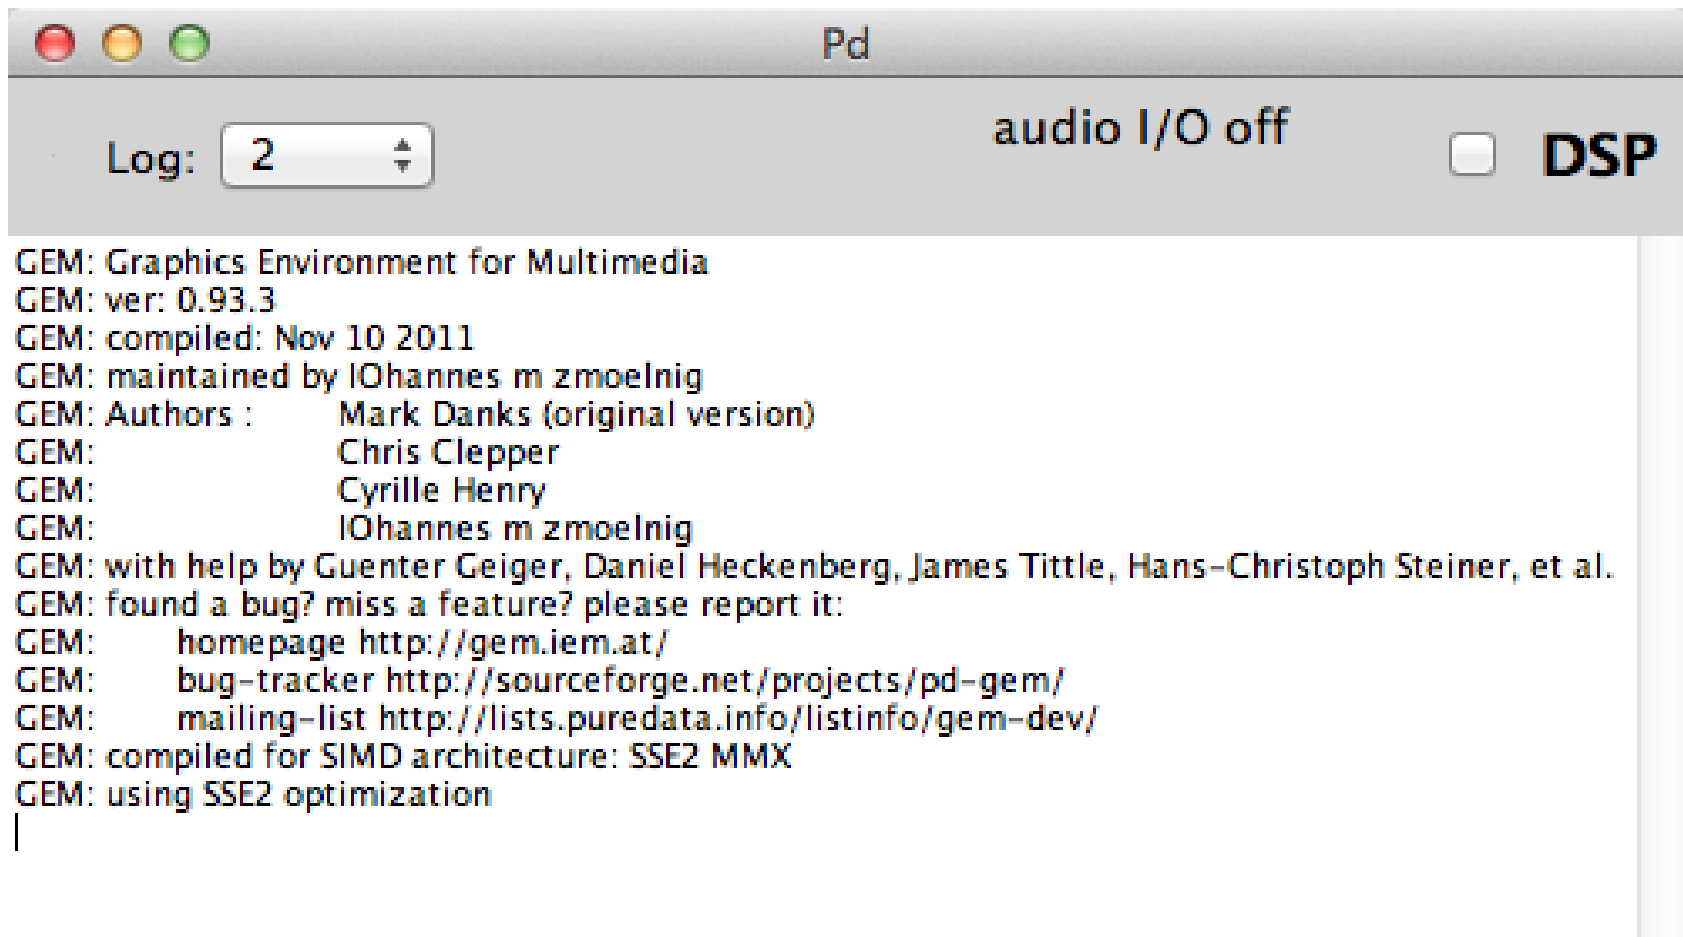

Add path to Gem

If you did it right

- When you quit and re-open Pd you should see this message in the main console

errors

- If you don't see the message, chances are your path is wrong. Check the error message and try again. Write me an email if you can't get it to work...
